Seoul, South Korea

CAREER STATEMENT

Automotive engineer with experience in Software-Defined Vehicles (SDV), embedded systems, and driver monitoring systems. Developed embedded applications integrating Raspberry Pi, CAN communication, Python, C++, and Qt/QML for real-time vehicle data acquisition, processing, and HMI visualization. Built perception and driver state monitoring pipelines using computer vision and prototyped SDV applications with CARLA, Zenoh, Kuksa, and VSS during the official Eclipse SDV Hackathon. Completed an R&D internship at AUMOVIO, contributing to automotive requirement engineering through customer requirement management, engineering specification and revision control, and requirement traceability using enterprise engineering tools. Also completed SEA:ME @ 42 Wolfsburg, a Volkswagen Group mobility software program, collaborating with international teams to develop next-generation mobility software.

WORK EXPERIENCE

Requirements Management Intern

- Managed and distributed Hyundai/Kia Motors requirements in IBM DOORS and Jira, maintaining change control and RTM.
- Tracked end-to-end status and coordinated stakeholders from scoping to release.

Aumovio Electronics,
Sejong, South Korea

Jun 2026 - Dec 2026

Republic of Korea Marine Corps Sergeant

- Squad Leader during compulsory service
- Completed ROK Marine Corps Ranger Course.

Pohang, South Korea

Oct 2019 - May 2021

EDUCATION

Bachelor of Automotive Engineering

- GPA: 3.35 / 4.5
- Minor: Future Automotive Engineering

Kookmin University,
South Korea

Feb 2019 - Aug 2027

Volkswagen SEA:ME Program - 42 Wolfsburg

- Master's-level mobility software program by 42 Wolfsburg with Volkswagen, CARIAD, Microsoft, and Bosch; specialized in distributed embedded systems, autonomous driving, and mobility cybersecurity.

Wolfsburg, Germany

Jul 2025 - June 2026

TECHNICAL SKILLS

Programming Languages

- C/C++
- C#
- Python
- JavaScript

Embedded Platforms

- Jetson Orin Nano
- Raspberry Pi
- Arduino
- YOCTO project

Development Tools

- Git
- Jira / Confluence
- DOORS

Licenses

- Korean Driving Licence: Class 2 - equivalent to Germany Class B
- English: C1 (TOEFL 100)

Languages

- Korean (Native)
- English (Fluent)

ACTIVITIES AND INTERESTS

DMS(Driver Monitoring System) Project

- Developed an on-edge Driver Monitoring System using a Vision-Language Model to infer driver behavior context beyond MediaPipe's predefined gestures; runs fully offline.
- Integrated VLM reasoning with sensor/keypoint signals to detect nuanced unsafe actions (e.g., drowsy texting vs. device holding), improving robustness in unseen scenarios.

Wolfsburg, Germany

Mar 2026 - June 2026

Eclipse SDV Hackathon — Zenoh · Kuksa · VSS

- Built a distributed autonomous-pursuit system on Zenoh, Kuksa, and VSS integrated with CARLA — a pub/sub vehicle-data pipeline

Eclipse Foundation
Berlin, Germany

Oct 2025
